

# AWS LEX CHATBUDD Y-EC2

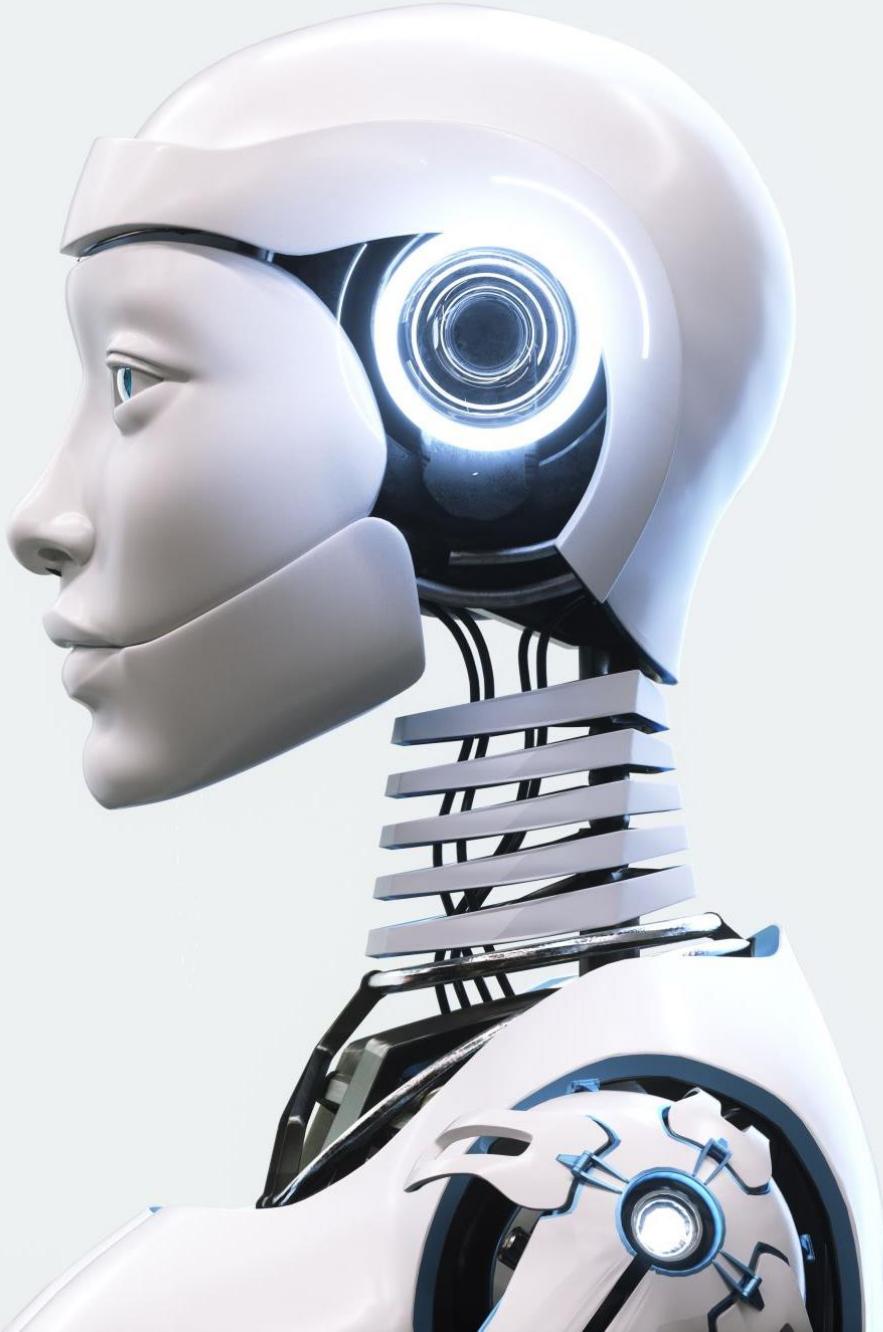

---

*AN EDUCATIONAL CHATBOT  
DEMONSTRATION USING  
AMAZON LEX*

---

# **Introduction and project Goal**

- The goal of this project was to create An interactive EC2 chatbot
- The chatbot quizzes learners on Amazon ec2 fundamentals
- We used Amazon Lex to build a conversational quiz experience( chatbot)
- The solution makes learning more engaging and interactive

---

# Client requirements

Interactive quiz  
chatbot

Topic – EC2

Multiple-choice  
questions

Feedback for  
correct and  
incorrect  
answers

Easy to use an  
d educational

# Solutions Overview

- Build an interactive chatbot using Amazon Lex
- Used Intents and Utterances to start a quiz
- Designed multiple choice questions
- Implement a feedback for correct and incorrect answers

# Technical Approach

**Created an intent: EC2Quiz**

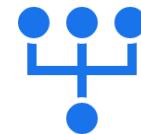

**Added quiz-related  
utterances :**

Start quiz  
Quiz me EC2

**Used responses to: MH**

**Used simple branching(A,  
B, C)**

# LIVE DEMONSTRATION

- During the demo we will show:
- Starting the quiz in Amazon Lex
- Answering questions correctly and incorrectly
- How the chatbot responds with feedback
- Smooth flow between quiz questions

---

# Conclusion

- Successfully built a working EC2 quiz chatbot
- The solution meets all client requirements
- The chatbot can be easily extended to other AWS topics  
(S3, VPC, Lambda, etc.)
- Ready for deployment and further improvements
